## About Islamic Banking and Finance

Islamic Banking and Finance has been a hope for the purified financial system around the globe and is being considered as the best option to address the damages of interest based system in banking and financial industry. The growth indicators for Islamic Banking and Finance ensure its strength and global acceptance. Importantly the recent global finance crises have proved the rationality behind Islamic Banking and Finance when no substantial damage to the Islamic Banking and Finance industry was evidenced in consequences of such global finance crises. Beside the appreciable growth indicators in Islamic Banking and Finance the lack of human capital and skilled personnel have been the critical areas which require immediate attention.

## About Cambodia

Cambodia, located in the heart of Southeast Asia, has transformed rapidly over the past two decades, achieving steady economic growth driven by tourism, agriculture, garment manufacturing, and real estate development. Its banking industry is one of the fastest-growing in the region, characterized by a liberal financial market with numerous commercial banks, specialized banks, and microfinance institutions operating under the oversight of the National Bank of Cambodia (NBC). The sector has embraced technological innovation, particularly mobile payments and digital banking, with the Bakong blockchain-based payment system becoming a key milestone in modernizing financial services. While conventional banking dominates, there is a rising interest in financial inclusion, ethical finance, and diversification of financial products—offering growing potential for introducing Islamic banking, takaful, and other alternative financial models in the Cambodian market.

## Training Contents

- Introduction of Islamic economics and finance system
- Basic prohibitions in business relations
- Contracts in Islamic finance: basic concepts
- How Islamic banking is different from traditional (conventional) banking
- Main products in Islamic finance:
- Main products in Islamic Finance:
