More details are available at: www.alhudacibe.com

## ABOUT

# Islamic Banking and Finance

Islamic Banking and Finance has been a hope for the purified financial system around the globe and is being considered as the best option to address the damages of interest based system in financial industry. Currently, Islamic banking and finance total volume has crossed \$2.6 trillion globally which is expected to grow and reach \$3.5 trillion by 2024. Globally, total 2,500 Islamic banking and financial institutions are working in every populated continent including both Muslims and non-Muslim countries.

The growth indicators for Islamic finance ensure its strength and global acceptance. Importantly the recent global finance crises have proved the rationality behind Islamic Banking and Finance when no substantial damage to the Islamic Banking and Finance industry was observed in consequences of finance crises. Beside the appreciable growth indicators in Islamic Banking and Finance the lack of human capital and skilled personnel have been the critical areas which require immediate attention.
